

HydraFacial™ = Skin Health For Life™

The HydraFacial™ resurfacing procedure thoroughly cares for your skin, providing cleansing, exfoliation, extraction, and hydration all while Vortex –Fusing™ antioxidants, peptides, and Hyaluronic acid. Ranked above IPL, the HydraFacial™ is a non-invasive, non-surgical procedure that delivers instant results with no discomfort or downtime. The procedure is soothing, moisturizing, non-irritating and immediately effective.

The HydraFacial™ serums specifically target your skin issues including sun damage, blackheads and whiteheads, enlarged pores, acne, brown spots, uneven skin tone, and early aging fine lines and wrinkles. The best part - it's not just a quick-fix-it procedure. The HydraFacial™ improves the quality of your skin, actually helping to making it **healthy**.

The HydraFacial™ procedure is a two-step process: the in-office procedure augmented by the daily care treatment. Your HydraFacial™ results can be extended through the use of the daily care solutions – the same ingredients found in the serums are available for at-home use.

The HydraFacial™ LED Light Therapy mode provides additional benefits post HydraFacial™ treatment. The red LED light is used to improve the appearance of skin firmness and resilience. It also helps reduce the appearance of fine lines and wrinkles, hyperpigmentation, and other signs of aging. The blue LED light is extremely beneficial for people who suffer from oily skin or breakouts.

The HydraFacial™ has been a favorite pre-red carpet treatment for the stars and is even enjoyed by the Prince of Monaco! It has also been featured on Fox, NBC, ABC, CBS The Doctors TV show, Allure Magazine, Essence Magazine, InStyle Wedding Magazine, and more.
